

## Paragon II Release 4.2 and Paragon II System Controller (P2-SC)

Release Date: April 30, 2007

Last Updated: April 30, 2007

Paragon II Release 4.2 is not compatible with the Paragon II System Controller (P2-SC). Release 4.2 is considered a “standalone” release and is not supported for installation in a Raritan PCCI environment. PCCI integration is planned for an upcoming release.

Current P2-SC customers who wish to expand their Paragon II infrastructure by adding Paragon II switches and user stations are advised to specially request new equipment that is provided with firmware version level 4.1 when placing an order.

In the event version 4.2 components are received and deployed in a P2-SC environment, the version level may be easily rolled back to 4.1. One of two methods may be used:

- From P2-SC 1.2.0, push the Paragon II components back to the desired version.
- Utilize the Paragon Update application to install/reinstall the desired version (standalone method).

Instruction on performing firmware installations is provided in Paragon II and P2-SC user documentation. Also, please contact Raritan Tech Support should any assistance be needed.
