brackets for CS8-PENT (1U)

The right KVM switch for the right space at the right price.

CompuSwitch-PENT models for two, four, and eight computers offer the reliability and performance of high-end KVM (Keyboard, Video, Mouse) switch products, at a lower price. CompuSwitch-PENT is an ideal choice to save time and space for smaller-scale PC environments like branch office and departmental LANs, small businesses, government offices, home offices and test labs for a host of applications.

CompuSwitch-PENT is currently undergoing EAL4+ Common Criteria certification. An international standard signed by 23 countries and recognized by many more, Common Criteria certification is required by many U.S. government agencies. Common Criteria is also an ISO standard 15408, ACSI 33, and is followed by the European Union and the Institute of Electrical and Electronics Engineers.

State Department approved Ref. (DS/CIS/IST)

- Multi-computer/platform software development
- Hardware/software testing
- Access to an operation of 2+ workstations

Premium performance and reliability

CompuSwitch-PENT is built with Raritan's unique emulation technology, which dedicates an individual processor to each connected computer so that each computer always "sees" its own keyboard and mouse. This eliminates keyboard and mouse lockups and ensures smooth, flawless switching and operation of any mix of computers running any operating system.

Selection of computers is done directly by touching the individual port buttons on the front panel of CompuSwitch-PENT. Standard features like AutoScan and AutoSkip make operation simple and convenient. CompuSwitch-PENT can be rack-mounted for a neat, professional installation with an available 1U, industrial-strength, rack-mount chassis with a built-in cable support bracket.

CompuSwitch-PENT

CompuSwitch-PENT is available in 2-channel, 4-channel, and 8-channel models, and is powered by the connected computers. Connect any mix of computers, running any operating system. Raritan's unique keyboard and mouse emulation insures flawless operation of all connected computers.

Installation is as easy as connecting our tangle-proof cables into the keyboard, monitor, and mouse ports of each computer. These coaxial, double-shielded cables, maintain high-resolution video.

Select computers directly by touching the individual channel buttons on the front panel.

Features

- Low-cost, high-reliability, easy to use
- 2-channel, 4-channel, and 8-channel
- Dedicated keyboard and mouse emulator for each PC for flawless operation
