

The “More Control for Less” Sales Event

Our award-winning KVM-over-IP switches now come with a brand new feature: **20% off our centralized management solution.**

Raritan's Dominion® KX II, awarded “Best KVM” by *InfoWorld*, allows BIOS-level access to servers at the rack, over IP and via modem. It supports rack-mounted servers as well as IBM®, HP and Dell® blade servers.

CommandCenter® Secure Gateway, Raritan's centralized management appliance, provides centralized access and consolidated security to the entire IT infrastructure, all from a single interface – virtual machines, rack-mounted servers, blade systems and networking devices.

Together, they make your life easier. Simply by logging on to a single IP address using a standard Web browser, you can access and power control all of your physical (rack-mounted and blade servers) and virtual servers located anywhere in the world.

And now, when you purchase three or more Dominion KX II KVM-over-IP switches between January 1, 2010 and March 31, 2010, you'll receive a **20% discount off** the purchase of a CommandCenter Secure Gateway.

This offer is valid for the purchase of the following CommandCenter Secure Gateway part numbers: CC-E1-256, CC-E1-512, CC-V1-128 and CC-V1-256. Cluster Kit part numbers are not eligible. Sorry, this offer cannot be combined with our “At-the-Rack Savings Event.”

Here's a great opportunity to get the award-winning technology of our Dominion KX II models plus a great discount on our CommandCenter Secure Gateway. **But only if you act by March 31. So contact your Raritan Representative today.**

Terms and Conditions

This is a limited-time offer. Offers cannot be combined with special product pricing or any other discount offer unless otherwise specified in writing. Only purchases by end-user customers in the U.S. or Canada with a valid U.S. or Canadian mailing address are eligible.
