

## IMPORTANT ANNOUNCEMENT:

The Dominion KSX II, launched in 2007, relies on browser support for the Java platform. Some customers may not be able to utilize Java-based products with their current platform and browser.

For the latest Java-free support, customers should consider the [Dominion KX III KVM-over-IP Switch](#) with the [Dominion Serial Access Modules \(DSAM\)](#). Java-free access of KVM and serial devices is available on Windows, Linux and Mac platforms.
