

RACK PDU

COLOR-CODING OPTIONS

DATA CENTER POWER IDENTIFICATION ISSUES? PUT SOME COLOR ON IT!

In critical facilities and data centers where different types of technology converge at the IT rack, many are transforming the inside of the rack to improve object recognition and identification with color-coded rack power distribution units (PDUs). The benefits realized by incorporating a well-designed color-coding scheme will significantly improve the management of your power infrastructure, resulting in increased business efficiency and service levels.

Raritan Rack PDU color-coding customizations provide a quick and straightforward visual in-rack identification experience. It's up to you to decide which color-coding option best fits your facility and project requirements to organize your rack by color uniformity.

BENEFITS

- Quickly and easily separate, locate, and identify your data center's power chain.
- Precisely identify which rack PDUs are connected to which power feeds to improve your power infrastructure's overall performance, reliability, and efficiency.
- Make it easy for technicians working on your IT rack to troubleshoot problems and prevent altering the wrong equipment.
- Keep racks organized and reduce time tracing and troubleshooting faults, thereby improving service levels.

COLOR-CODE OPTIONS

PDU COLOR LABELS

Our four-part PDU color labels are available at no extra cost, with no extension to lead time, and can be easily applied to most PX4 Rack PDU models. Color labels are strategically placed along the PDU during the production of your order and can be retrofitted into production environments or modified as project requirements change.

The labeling system includes a color-coded:

- Branding label
- Controller/Network Card label
- Power cord band
- Equipment dot (typically placed on the equipment connected to the PDU)

FULL-COLOR PDU CHASSIS

On select PX3 and PX4 Rack PDU models, the PDU's chassis can be professionally powder-coated with a vibrant, durable, and high-quality color finish. The chassis' full color is visible along the entire length of the PDU. On some models, color-coded labels are also added to the front of the PDU to ensure the selected color is visible throughout the rack. This option will incur moderate customization costs and will add lead time to the order.

AVAILABLE COLORS

Actual product colors may vary. Some availability restrictions apply. If you are unable to find a color that matches your needs, please contact a Raritan Power Expert with your requirements.
